1943 Iris
Season

Foreword

Again we offer you advanced IRIS FANCIERS a heavy list of the newer iris creations from prominent iris hybridizers.

To you members of the American Iris Society and to you iris dealers all over the country, here is a list of newer things at prices at wholesale or less.

We make no distinction between the member of the Society and the iris dealer in regard to prices, as we feel the Iris Society member who purchases the new higher priced novelties, places them in their gardens on view to the public, will advertise these new creations, and create a wish on the part of the visitor to buy these newer things when they become reasonably priced; then the iris dealer will reap his harvest by having stocks to sell at popular prices.

This catalog is not a retail catalog, and prices here less the discounts in no way must be compared with the mail order iris specialists, who cater to the average gardener that buys the general list of iris.

We receive iris from all over the country, and we know our stock will be better than the best, as we carefully tend each hill, and labor cost is relatively higher than if these rhizomes would come from the average commercial planting.

Our descriptions are sketchy for we know you iris fanciers that receive this catalog know, or have already read, the advance bulletins on these newer creations.

We wish to thank the many hundreds of iris lovers who ordered of us last season, and we promise that our stock this year is even better than the high standards we shipped last year.

Please read our terms, special offers, and guarantee; we again offer sensational values.

Remember this: that our stocks in some varieties are small, and that we only sell our surplus stock, and early orders will avoid disappointment.

To Iris Hybridizers

To further the interest in that very fertile field of producing newer colors, combinations, and better iris varieties: we will do our part to help out by the following offer to hybridizers, and to take advantage of this offer: we require that no iris variety bought through this offer be offered for sale until the year 1945.

It is understood: that if you wish to take advantage of this offer: that you write upon your order as follows:

"As a hybridizer I agree not to sell any of these iris varieties until the year 1945, and these varieties I will use in hybridizing."

Here Is the Offer

Any list of iris selected for breeding purposes in an amount of \$100.00 or more: you may select an equal value of additional iris. This gives you the entire list at fifty cents on the dollar of the listed price.

The order must be \$100.00 or more, nothing less. Do not expect we will receive any order under these terms under \$100.00.

Six collections only at this price.

Iris Exchange Department

OUR IRIS SOCIETY MEMBERS usually buy many new things each year, and to keep up with the procession of new rare seedlings would require a very heavy expenditure.

We offer this to you: submit to us what surplus you have to spare in new varieties not on our list, and we will be glad to exchange with you some of ours you lack, for some of yours we lack.

Do not submit any variety we have listed, and do not offer any older varieties, as we are not in the general iris business, and of the older varieties we only keep one plant for check purposes.

This friendly exchange will further the distribution of many new things that would not be possible if actual cash would have to be spent to obtain a new much talked of variety.

We have small stocks of many new iris not listed in our catalog; so write what you have, and tell us what you want.

Write us about any new rare seedlings you have seen in your travels; we welcome an exchange of garden notes of the newer things.
